SUMMARY

A full-stack engineer building scalable, performant, and intuitive web apps. With over 3 years of experience in designing, developing, and deploying web applications in NextJS, ReactJS, Django, GraphQL, Node, and Express, I enjoy both the complexity of solving hard problems and the simplicity of building clean interfaces.

A quick learner who can swiftly adapt to a project's needs, I'm a team player who thrives in a tightly-knit team to collaborate and help lead efforts to create products that are loved.

EDUCATIONAL QUALIFICATION

Bachelors of Technology in Computer Science

Amrita Vishwa Vidyapeetham

Amritapuri, Kollam, India.

May 2022

Board of Intermediate Education

SER Junior College

Visakhapatnam, Andhra Pradesh, India.

May 2018

Board of Secondary Education

Sri Chaitanya EM School

Visakhapatnam, Andhra Pradesh, India.

May 2016

TECHNICAL SKILLS

- **Languages:** Python, Java, Javascript, C++, C, Bash.
- **Frameworks:** React, Next, Node, Express, Django
- **Cloud Infrastructure:** AWS, Google Cloud, Azure, Heroku, DigitalOcean
- **Skills:** Problem Solving, Flexibility, Critical Thinking, Team work
- **Tools & Technologies:** Git, GitHub, GitLab
- **Operating Systems:** macOS, Linux, Windows

EXPERIENCE

Daily, Solutions Engineer

Nov 2021 - Present

Daily is a video and audio call platform that offers easy-to-use and customizable video chat APIs for businesses to integrate real-time communication into their applications and websites.

- Developed an internal tool with AI capabilities for meeting management, featuring automated transcription and intent-based summarization, enhancing team productivity and collaboration.
- Led Proof of Concept (PoC) demonstrations, effectively illustrating the value of our solutions to prospective customers, leading to successful customer acquisition and engagement.
- Provided expert-level technical support, resolving customer inquiries and challenges, and ensuring seamless integration of our products.
- Demonstrated proficiency in solution architecture and AI integration, contributing to the development of innovative technical solutions.
- Collaborated with a cross-functional team to build a test bench application for daily comparisons with competitors, facilitating data-driven decision-making and competitive analysis.

Whitebrick, Frontend developer

May 2021 - Nov 2021

It's an open-source airtable - ie a no code RDBMS

- I played a pivotal role in designing and developing various components of our web applications, ensuring they met high-quality standards and user expectations.
- I specialized in creating and optimizing landing page sections to enhance the user experience and engagement on our websites.
- I successfully integrated our applications with the backend systems, enabling smooth data flow and functionality for our users.

TAYFA, Full stack developer

November 2020 - January 2021

An early-stage startup that allows users to make a website just with drag drop, and allows them to dynamically pass the required APIs to the components.

- I took charge of designing and developing various layouts and components for web pages, ensuring an engaging and user-friendly interface.
- I played a crucial role in developing APIs, facilitating seamless data exchange and integration between our web applications and backend systems.
- I successfully implemented a version history feature for the layouts, allowing for better management and tracking of changes for customers.

GraphQL, Intern

June 2020 - August 2020

GraphQL is a query language for APIs and a runtime for fulfilling those queries with your existing data. GraphQL provides a complete and understandable description of the data in your API, gives clients the power to ask for exactly what they need and nothing more, makes it easier to evolve APIs over time, and enables powerful developer tools.

- Developing and redesigning the new UI components of GraphQL
- Added support for internationalization

PROJECTS

- **CMS (Club Management System):** I developed a web portal to keep track of attendance, status updates of members, send RSVP Links for managing public events, managing GitHub, GitLab, Cloudflare, Telegram accounts of the Club, including all the statistics of particular user.
- **CustomQL:** I developed a GraphQL IDE which will help the developer to increase their productivity with working on API ecosystem. It allows to fetch from any particular URL, to export results, supports different tabs to have different queries, to copy the cURL command directly and also to send custom headers.
- **amFOSS (amfoss.in):** I worked on designing, developing and maintaining the official website of the India's leading FOSS computer science club. The website is made with NextJS which consumes API from Django, GraphQL based backend.
- **Ocellus:** This project does OSINT data analysis: IP address scans, IP address heatmap, tracking IPs, tracking mac addresses of a system, phone number and email verification, and blacklist and domain analysis. This was developed as a part of Hac'KP, an international hackathon organized by the Kerala Police Cyberdome. The project was ranked under the top 20 out of 200+ participants.

OPEN SOURCE CONTRIBUTIONS

- **GraphQL:** Open source contributor at GraphQL, a data query and manipulation language for APIs, and a runtime for fulfilling queries with existing data. GraphQL is an advanced version of REST APIs. GraphQL was developed internally by Facebook in 2012 before being publicly released in 2015.
- **Public Lab:** Image Sequencer is different from other image processing systems because it's non-destructive: instead of modifying the original image, it creates a new image at each step in a sequence.

ACHIEVEMENTS

- Got selected for HackMIT 2020, which is the annual hackathon organized by Massachusetts Institute of Technology.
- My team was among the top teams out of 200+ teams that participated in Hac'kp 2020, the international hackathon organized by the Kerala Police Cyberdome.
- Won 3rd prize in INQ Innovation Hackathon organized by Kerala Startup Mission.
- Google Summer of Code 2019 Mentor for Public Lab.
- Google Code-in 2019 Mentor for Public Lab.
- Got selected and attended for 3+ biggest Hackathons held in India.
- Selected for LFX Mentorship under The GraphQL Foundation, sponsored by The Linux Foundation

LANGUAGE PROFICIENCY

English	Speaking, Reading, Writing and Understanding
Telugu	Speaking, Reading, Writing and Understanding
Hindi	Speaking, Reading, Writing and Understanding

PERSONAL INFORMATION

- **Date of Birth:** 13 April, 2001
- **Residence:** 2nd floor, above Sai Harsha Enterprises, Gopalapatnam, Visakhapatnam, Andhra Pradesh, India
