SUMMARY

Experienced full-stack engineer with a successful track record in designing, developing, and deploying scalable web applications using Next, React, Django, GraphQL, Node, and Express. Over 3 years of hands-on experience, I bring a results-oriented approach to projects, demonstrating a knack for solving complex problems and crafting intuitive interfaces. As a quick learner and dedicated team player, I thrive in dynamic environments, contributing to the success of collaborative efforts in creating beloved products.

WORK EXPERIENCE

Solutions Engineer - Daily, Remote Nov 2021 - Present

- Spearheaded an internal tool with AI capabilities for meeting management, featuring automated transcription and intent-based summarization, enhancing team productivity and collaboration.
- Led Proof of Concept (PoC) demonstrations, effectively illustrating the value of our solutions to prospective customers, leading to successful customer acquisition and engagement.
- Provided expert-level technical support, resolving customer inquiries and challenges, and ensuring seamless integration of our products.
- Demonstrated proficiency in solution architecture and AI integration, contributing to the development of innovative technical solutions.
- Collaborated with a cross-functional team to build a test bench application for daily comparisons with competitors, facilitating data-driven decision-making and competitive analysis.

Frontend Developer - Whitebrick, Remote (Freelance) May 2021 - Nov 2021

- Played a pivotal role in designing and developing various components of our web applications, ensuring they met high-quality standards and user expectations.
- Specialized in creating and optimizing landing page sections to enhance the user experience and engagement on our websites.
- Seamlessly incorporated our applications with backend systems, ensuring efficient data flow and optimal functionality for users.

Fullstack Developer - Tayfa, Remote (Freelance) Nov 2020- Dec 2020

- Led the design and development of diverse layouts and components for web pages, ensuring the creation of engaging and user-friendly interfaces.
- Played a crucial role in developing APIs, facilitating seamless data exchange and integration between our web applications and backend systems.
- Spearheaded the implementation of a version history feature for layouts, enabling better management and seamless tracking of changes

Student Developer - GraphQL Foundation, Remote (LFX Mentorship) Jul 2020- Oct 2020

- Contributed to expanding the capabilities of GraphiQL by introducing a plugin system. This enhancement allowed for greater customization, extensibility and enhancing GraphiQL.
- Worked on the implementation of the new redesigned layout, built and integrated new React components.

PROJECTS

CMS (Club Management System)

- Developed a comprehensive web portal for efficient club management, attendance tracking, and member communication.
- Implemented user-authenticated attendance tracking, realtime member status updates for improved communication.

- Implemented an RSVP link management system for public events.
- Created a user statistics dashboard showcasing attendance, updates, and contributions.
- Tech Stack - Django, GraphQL, Postgres

amFOSS (<https://amfoss.in>)

- Designed, developed, and maintained the official website of India's leading FOSS computer science club.
- Led the end-to-end design and development process for the website.
- Ensured seamless integration with the Django backend through GraphQL.
- Tech Stack - Gatsby (Jamstack)

Ocellus

- Engineered an OSINT (Open-Source Intelligence) data analysis project that includes IP address scans, IP address heatmapping, IP and MAC address tracking, phone number and email verification, as well as blacklist and domain analysis.
- Project created as part of Hac'KP, an international hackathon organized by the Kerala Police Cyberdome.
- Ranked among the top 20 projects out of 200+ participants.

EDUCATION

Bachelors of Technology, Computer Science & Engineering

June 2018 - May 2022

Amrita Vishwa Vidyapeetham (Kerala, India)

OPEN-SOURCE CONTRIBUTIONS

- **GraphQL:** Open source contributor at GraphQL, a data query and manipulation language for APIs, and a runtime for fulfilling queries with existing data. GraphQL is an advanced version of REST APIs. GraphQL was developed internally by Facebook in 2012 before being publicly released in 2015.
- **Public Lab:** Image Sequencer is different from other image processing systems because it's non-destructive: instead of modifying the original image, it creates a new image at each step in a sequence.

ACHIEVEMENTS

- Completed the LFX Mentorship program under **The GraphQL Foundation**, sponsored by The Linux Foundation.
- Selected to participate in **HackMIT 2020**, the annual hackathon hosted by the Massachusetts Institute of Technology.
- Achieved a **top-ranking** position among 200+ participating teams in **Hac'kp 2020**.
- Secured the **3rd prize** in the **INQ Innovation Hackathon** conducted by the Kerala Startup Mission.
- Served as a **Mentor** for **Google Summer of Code 2019** and **Google Code-in 2019** for Public Lab.
- Attended three or more of the largest Hackathons in India, showcasing expertise in diverse competitive coding environments.

SKILLS

- **Languages:** Python, Java, Javascript, C++, C, Bash.
- **Frameworks:** React, Next, Node, Express, Django
- **Cloud Infrastructure:** AWS, Google Cloud, Azure, Heroku, DigitalOcean
- **Tools & Technologies:** Git, GitHub, GitLab
- **Operating Systems:** macOS, Linux, Windows
