Education

Stony Brook University

Master of Science in Computer Science

Amrita Vishwa Vidyapeetham

Bachelor of Technology in Computer Science & Engineering

Aug 2025 – May 2027

Stony Brook, NY

Nov 2018 – May 2022

Kerala, India

Experience

Aragon.ai

Software Engineer

Jun 2024 – Jul 2025

San Francisco, CA (Remote)

- Led the development of cross-platform React Native application for Aragon.ai, delivering a comprehensive mobile platform with AI-driven headshot generation, advanced image editing tools, and user-friendly interface design.
- Optimized core web vitals and page performance metrics by 50%, improving user experience and SEO rankings through implementation of performance optimization techniques including code splitting, lazy loading, and caching strategies.
- Spearheaded a comprehensive strategic data-driven redesign of five high-converting landing pages, incorporating A/B testing; achieved a 20% increase in conversion rates within the first quarter, directly boosting user acquisition.
- Revamped the user onboarding process by streamlining the back-end infrastructure and optimizing database queries, resulting in reducing average page load times by 60% and improving user satisfaction scores by 35%.
- Built comprehensive analytics dashboard for subscription and product KPIs, enabling real-time monitoring and data-driven decision making for business metrics, resulting in improved operational efficiency and strategic planning.

Daily.co

Solutions Engineer

Nov 2021 – May 2024

San Francisco, CA (Remote)

- Pioneered the first comprehensive developer-facing showcase for Daily's Interactive Live Streaming APIs using React/Next.js, creating reusable demo applications that directly accelerated customer product launches.
- Developed internal meetings tool with Daily's APIs featuring AI summaries, sentiment analysis, and talk-time metrics. The tool became indispensable in customer-facing teams with 1500+ meetings hosted as serves as flagship example.
- Provided expert-level technical support and led tailored Proof-of-Concept (PoC) demonstrations to showcase Daily's API capabilities across diverse use cases, directly contributing to customer acquisition and sustained engagement.
- Collaborated on building a comprehensive test bench application to compare Daily's performance against key competitors, enabling data-driven decision-making processes and optimization strategies.

Mentorship

GraphQL Foundation | LFX Mentorship program

Jul 2020 - Oct 2020

- Collaborated on expanding the capabilities of GraphiQL by introducing a plugin system. This enhancement allowed for greater customization, extensibility and GraphiQL enhancement, improving the developer experience.
- Implemented a redesigned layout by building custom React components to enhance user interface functionality.

Projects

Daily Studio | Multiplayer OBS-in-the-browser

- Architected and developed a scalable, browser-based live streaming studio supporting up to 100k concurrent viewers with <200ms latency, featuring multi-platform streaming and real-time "bring-to-stage" interactions with role management.
- Built a customizable drag-and-drop video layout system and audience engagement platform, including live chat, viewer analytics, remote media playbook, across browsers and platforms, supporting 100K+ concurrent users per room.
- Integrated Daily's Interactive Live Streaming (ILS) and Video Component System (VCS) APIs with Next.js.

amFOSS CMS | Club Management System

- Led the design and development of amfoss/cms using Django, GraphQL, and React, creating a comprehensive web portal that empowers the amFOSS community to efficiently manage attendance tracking, member status updates, and RSVPs.
- Architected and implemented robust API integrations for GitHub, GitLab, Cloudflare, and Telegram platforms, enabling seamless account management, automated workflows, and unified club operations across all digital touchpoints.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL

Technologies/Frameworks: Node.js, Express.js, React.js, Next.js, GraphQL, Django

Databases: PostgreSQL, MongoDB, MySQL

Operating Systems: MacOS, Linux, Windows

Cloud Infrastructure: AWS, GCP
