SUMMARY

A high performing individual and a solid team player with a diverse set of skills with technical expertise in Web development to non technical skills such as UI/UX design, illustrations.

EDUCATIONAL QUALIFICATION

Bachelors of Technology in Computer Science

Amrita Vishwa Vidyapeetham; CGPA: 7.3

Amritapuri, Kollam, India.

Expected May 2022

Board of Intermediate Education

SER Junior College; GPA: 9.1

Visakhapatnam, Andhra Pradesh, India.

May 2018

Board of Secondary Education

Sri Chaitanya EM School; GPA: 8.7

Visakhapatnam, Andhra Pradesh, India.

May 2016

TECHNICAL SKILLS

- **Languages:** Python, Java, Javascript, C++, C, Bash.
- **Frameworks:** React, Next, Node, Express, Django
- **Cloud Infrastructure:** AWS, Google Cloud, Azure, Heroku, DigitalOcean
- **Skills:** Problem Solving, Flexibility, Critical Thinking, Team work
- **Tools & Technologies:** Git, GitHub, GitLab
- **Operating Systems:** macOS, Linux, Windows

AREAS OF INTEREST

Web, GraphQL, APIs, Automation, Software Engineering, Cybersecurity

PROJECTS

- **CMS (Club Management System):** I developed a web portal to keep track of attendance, status updates of members, send RSVP Links for managing public events, managing GitHub, GitLab, Cloudflare, Telegram accounts of the Club, including all the statistics of particular user.
- **CustomQL:** I developed a GraphQL IDE which will help the developer to increase their productivity with working on API ecosystem. It allows to fetch from any particular URL, to export results, supports different tabs to have different queries, to copy the cURL command directly and also to send custom headers.
- **amFOSS (amfoss.in):** I worked on designing, developing and maintaining the official website of the India's leading FOSS computer science club. The website is made with NextJS which consumes API from Django, GraphQL based backend.
- **Ocellus:** This project does OSINT data analysis: IP address scans, IP address heatmap, tracking IPs, tracking mac addresses of a system, phone number and email verification, and blacklist and domain analysis. This was developed as a part of Hac'KP, an international hackathon organized by the Kerala Police Cyberdome. The project was ranked under the top 20 out of 200+ participants.

EXPERIENCE

Whitebrick, Frontend developer

May 2021 - Present

It's an open-source airtable - ie a no code RDBMS

- Developed a grid component which allows to create, edit rows directly from UI.
- Integrated with redux to pass in the state all around the components.
- Developed a form maker which will allow to dynamically render the required fields according to the database.

TAYFA, Full stack developer

November 2020 - January 2021

An early stage startup which allows users to make website just with drag drop, and allows them to dynamically pass the required APIs to the components.

- Developed the React UI components for the landing page.
- Developed APIs which are efficient enough to serve for more than 10,000 users.

GraphQL is a query language for APIs and a runtime for fulfilling those queries with your existing data. GraphQL provides a complete and understandable description of the data in your API, gives clients the power to ask for exactly what they need and nothing more, makes it easier to evolve APIs over time, and enables powerful developer tools.

- Developing and redesigning the new UI components of GraphQL
- Added support for internationalization

OPEN SOURCE CONTRIBUTIONS

- **GraphQL:** Open source contributor at GraphQL, a data query and manipulation language for APIs, and a runtime for fulfilling queries with existing data. GraphQL is an advanced version of REST APIs. GraphQL was developed internally by Facebook in 2012 before being publicly released in 2015.
- **Public Lab:** Image Sequencer is different from other image processing systems because it's non-destructive: instead of modifying the original image, it creates a new image at each step in a sequence.

ACHIEVEMENTS

- Got selected for HackMIT 2020, which is the annual hackathon organized by Massachusetts Institute of Technology.
- My team was among the top teams out of 200+ teams that participated in Hac'kp 2020, the international hackathon organized by the Kerala Police Cyberdome.
- Won 3rd prize in INQ Innovation Hackathon organized by Kerala Startup Mission.
- Google Summer of Code 2019 Mentor for Public Lab.
- Google Code-in 2019 Mentor for Public Lab.
- Got selected and attended for 3+ biggest Hackathons held in India.
- Selected for LFX Mentorship under The GraphQL Foundation, sponsored by The Linux Foundation

LANGUAGE PROFICIENCY

English	Speaking, Reading, Writing and Understanding
Telugu	Speaking, Reading, Writing and Understanding
Hindi	Speaking, Reading, Writing and Understanding

PERSONAL INFORMATION

- **DOB:** 13 April, 2001
- **Residence:** Flat No 202, Venakata Ratnavati Residency, Akkayapalem, Visakhapatnam, Andhra Pradesh, India
