SUMMARY

A Fullstack Web Developer, and a team player dedicated in building and optimizing the performance of user-centric, high-impact websites with 2 years of experience in designing and developing user interfaces, testing, debugging.

EDUCATIONAL QUALIFICATION

Amrita Vishwa Vidyapeetham

Bachelors of Technology in Computer Science

Amritapuri, Kollam, India.

Expected May 2022

SER Junior College

Higher Secondary

Visakhapatnam, Andhra Pradesh, India.

May 2018

Sri Chaitanya EM School

Secondary

Visakhapatnam, Andhra Pradesh, India.

May 2016

TECHNICAL SKILLS

- **Languages:** Python, Java, Javascript, C++, C, Bash.
- **Frameworks:** React, Next, Node, Express, Django.
- **Skills:** Web Development, Problem Solving.
- **Tools & Technologies:** Git, GitHub, GitLab.
- **Operating Systems:** macOS, Linux, Windows.

EXPERIENCE

amFOSS

Lead Web Developer

2018 - present

- Built and maintained internal websites using React (Next.js and Gatsby) with GraphQL and Django.
- Extended internal front-end component library in React with Styled Components.

Google Summer of Code and Google Code-in

Mentor

2019

- I served as a Mentor in Public Lab for Image Sequencer Project, a javascript image processing system where you can modify images. It was a really good experience in mentoring students, reviewing the PRs and planning for the updates.

PROJECTS

- **GraphQL (Open Source Contributor):** a data query and manipulation language for APIs, and a runtime for fulfilling queries with existing data. GraphQL was developed internally by Facebook in 2012 before being publicly released in 2015.
- **Public Lab (Open Source Contributor):** Image Sequencer is different from other image processing systems because it's non-destructive: instead of modifying the original image, it creates a new image at each step in a sequence.
- **CMS (Club Management System):** A web portal to keep track of attendance, status updates of members, send RSVP Links for managing public events, Managing GitHub, GitLab, Cloudflare, Telegram accounts of the Club.
- **NiDar:** Nidar, a PWA .The app uses a safeness heatmap and zoning to recommend the safest route, through data mining done on historical crime data, proximity to police stations, bars etc, and the incidents reported through the app. The app also allows to report incidences at a tap of button right from the notification bar, hassle-free and takes it up with the authorities.
- **Gatsby Theme Console:** A jekyll theme inspired by linux consoles for hackers, developers and script kiddies.
- **CustomQL:** A Custom GraphQL IDE to have Features like fetching from a particular URL, export results, copy cURL command, Tabs, Custom Headers.

ACHIEVEMENTS

- Won 3rd prize in INQ Innovation Hackathon organized by Kerela Startup Mission.
- Google Summer of Code 2019 Mentor for Public Lab.
- Google Code-in 2019 Mentor for Public Lab.
- Got selected and attended for 3+ biggest Hackathons held in India.
